ABR

Your doctor has scheduled an ABR test for you. This is an evaluation that assesses your hearing system in more depth than a traditional hearing test. The evaluation is done at our Williamsville office at 1020 Youngs Road, Suite 110 (near Maple Road) in Williamsville. Since this time is being held for you, it is imperative that you be on time and that you contact our office at least one day prior to your appointment if you find it necessary to cancel your appointment.

This is a very easy test. There are no restrictions prior to the evaluation. You will be asked to sit quietly and listen to a clicking sound. The more relaxed you are the faster we will be able to complete the test. The test session will take approximately one hour.

The results of the test will not be available immediately. It usually takes a few days for us to interpret the results and for the doctor to review them. If you do not have an appointment to review the results you can call and make an appointment after the test is completed.

If you have any questions regarding the test, you can call 883-6800 and talk to an audiologist.
